Presentation

COMPLEMENTARY FEED FOR DEER

On special order !

Deer that are kept within fencing have to be supplemented with a concentrate besides eating proper hay. This concentrate must contain all essential elements for the deer to keep in good condition. They have to obtain nutrients from this concentrate, which they would normally find in the wild themselves. Highly suitable as a supplemental feed in winter for deer living in wildlife reserves.

Pack size

Bag of 20 kg

Pellets of 4 mm

Recommandations

Kasper Faunafood Deer Pellets are designed to be fed up to a 40% addition to (a combination of) forages like grass hay, silage and alfalfa hay.

Composition

Maize, alfalfa, rape, seed extracted, wheat middlings, sunflower seed extracted, soybeanmeal feed, wheat, beet pulp, cane molasses, linseed expeller, linseed, sodium chloride, magnesium oxide, calcium carbonate.

Crude protein	%	17.50
Crude fat	%	3.10
Crude fibre	%	12
Crude ash	%	7.40
