

## Complete feed for marmosets

SSNIFF range  
(Reference : 400702)

### Presentation

In that diet the nutrient and energy contents are markedly increased to compensate the limited feed intake capacity of marmosets, so that the supply with essential nutrients is ensured even in case of low feed intake. The higher vitamin D3 requirement of this species is considered with extra vitamin D3 supplementations. Moreover, the feedingstuff has an excellent taste due to the addition of dried fruits that enhances the acceptance by the animals.

### Recommendations

Adjust food intake to maintain ideal body condition and to minimise waste

### Pack size

Bag of 10 kg (Ref. 400702)  
Granule size : 4 mm

### Composition

Grain and grain by-products, oil seed products, sugar, milk products, vegetable oil, minerals, dried fruit, vitamins, trace elements

Crude protein	%	26
Crude fat	%	7.10
Crude fibre	%	2.50
Ash	%	6.60

### Instructions

The ssniff primate diets are generally designed for ad libitum access, however in certain cases it might be useful or necessary to restrict the daily feed consumption, e.g. in animals being susceptible to get obese.

Store in a cool dry place, and close the bag after use

Always ensure clean fresh water is available
