Presentation

FALCON START is a new original formulation specifically designed for growing falcon chicks.

The product is based on a well-balanced blend of essential amino acids, minerals and vitamins to guarantee perfect nutrient levels and to promote proper growth in chicks.

Some ingredients of FALCON START improve joint development, reducing the risk of rachitis (rickets) and leg deformities. The herbal extracts in FALCON START help to develop the body in different ways: immune system stimulation, liver protection, appetite and metabolism stimulation, antimicrobial activity.

The fructo-oligosaccharides contained in FALCON BOOST help to maintain beneficial intestinal flora such as *Lactobacillus spp.* and *Bifidus spp.*, reducing the potential risk posed by pathogens such as *E. coli* and *Candida albicans*.

FALCON START can be used from the second day after hatching until complete fledging.

FALCON START is the ideal supplement for hand feeding falcon chicks as it helps to reduce the risk of malnutrition and infections during the delicate growing period.

Pack size

Box of 100 g

Composition

Sugars: Dextrose, fructo-oligosaccharides, maltodextrin, rice starch.

Vitamins: A, D3, E, K, B1, B2, B6, B12, C, biotin, pantothenic acid, folic acid.

Amino acids: L-arginine, L-lysine, L-choline, L-methionine, L-histidine, L-leucine, L-isoleucine, L-phenylalanine, L-threonine, L-cystine, L-valine, L-tryptophan, L-aurine, L-carnitine, L-glucosamine.

Minerals: calcium carbonate, calcium lactate, copper, iron, cobalt, iodine, zinc, manganese, magnesium, potassium, selenium.

Herbal extracts: Alpha alpha, Fenugreek, Ginseng, Milk thistle, Boswellia, Eleutherococcus, spirulina.

Other ingredients: Yeasts, chondroitin sulphate, omega 3 fatty acids.

Instructions

Suggested dose: put 1-2 grams (half a measuring spoon) of the product per 100 grams of body weight in food (eviscerated prey) from hatching to fledging.
